

MOHIUDDIN

Full Stack Developer — Aspiring ML Engineer

mohiuddin3551@gmail.com — 7897312572 — Prayagraj, India — github.com/mohiuddin000

Professional Summary

Full Stack Developer with expertise in MERN stack and growing experience in Machine Learning, building scalable web applications and NLP-based recommendation systems. Strong foundation in REST APIs, authentication, and modern frontend development, with a focus on performance and clean code.

Technical Skills

- **Languages:** JavaScript, Python
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Redux
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, Mongoose
- **Machine Learning:** Pandas, Scikit-learn, NLP
- **Tools:** Git, GitHub, VS Code

Projects

Movie Recommendation System

Python, NLP, Scikit-learn, Streamlit

- Designed a content-based recommendation system using NLP on a dataset of 5000+ movies
- Engineered features from genres, cast, and overview using preprocessing techniques.
- Applied TF-IDF vectorization and cosine similarity for accurate recommendations.
- Deployed an interactive Streamlit web app for real-time suggestions.

ChatMTP – AI Chat Application

React, Node.js, MongoDB, JWT

- Created a full-stack AI chat application with secure authentication system.
- Implemented JWT-based login system and password encryption using bcrypt.
- Integrated AI API to generate dynamic real-time responses.
- Designed a responsive and modern chat interface for better user experience.
- Implemented backend APIs for handling user data and chat interactions.

AuthWithMERN

React, Node.js, MongoDB, JWT

- Built a complete authentication system with login, signup, and logout functionality.
- Implemented password hashing using bcrypt and token-based authentication using JWT.
- Managed user sessions and protected routes for secure access.
- Applied role-based access control for improved application security.

Backend Tweeter-YouTube Clone

Node.js, Express, MongoDB, Multer

- Developed a scalable backend combining features of Twitter and YouTube.
- Implemented video upload functionality using Multer.
- Built features like likes, comments, and follow/unfollow system.
- Designed RESTful APIs for user authentication and content management.
- Used JWT for secure authentication and authorization.

Education

B.Tech in Computer Science Engineering

2019–2023

Lovely Professional University

Certifications

- Meta Front-End Developer Professional Certificate
- GFG DSA Course
- Oracle Gen AI Certificate
